Bill Gates owns synthetic fruit coating — what's in It?

- Avocados, cucumbers, lemons and limes, mandarins, oranges, organic apples, grapefruit and mangos are listed as produce that are currently being treated with this coating. Apeel-treated produce can be identified by looking for the “Apeel Protected” produce sticker
- The coating, which cannot be washed off, likely contains toxic contaminants, including heavy metals and carcinogens, as well as trans fats and, potentially, harmful linoleic acid

Do you know what Apeel is? In an April 24, 2023, Twitter thread,<sup>1</sup> Alexis Baden-Mayer, political director at the Organic Consumers Association (OCA), lists the many patents associated with this mysterious synthetic fruit coating, which is even approved for use on produce certified as USDA Organic.

According to Apeel Sciences’ website,<sup>2</sup> Apeel is a plant-based protective coating that “helps the produce you love stay fresh for longer.” It retains moisture within the produce and keeps oxygen out, thereby slowing the spoilage rate.

Avocados, cucumbers, lemons and limes, mandarins, oranges, organic apples, grapefruit and mangos are listed as produce that are currently being treated with this coating.

## Red Flags

One of the warning flags that makes me question the safety of this product is the fact that Apeel Sciences (a DBA or “doing business as” of aPEEL Technology Inc.) was founded with a \$100,000 grant from the Bill & Melinda Gates Foundation.<sup>8</sup> That’s never a good sign. I can’t think of a single harmless product Gates has ever willingly poured his money into.

Other investors include the Rockefeller Foundation;<sup>9</sup> the World Bank Group; Anne Wojcicki, co-founder and CEO of the personal genomics company 23andMe; and Susan Wojcicki, former CEO of YouTube<sup>10</sup> (she stepped down in mid-February 2023<sup>11</sup>). By May 2021, Apeel Sciences was valued at \$1.1 billion.<sup>12</sup>

Apeel Science’s founder, James Rogers, Ph.D., is an agenda contributor to the World Economic Forum (WEF). He’s also a WEF Young Global Leader. In 2018, Rogers stated

One of the first things that came to mind when I heard of Apeel is that it fits right into President Biden's recently launched agenda to turn the U.S. food supply over to the biotechnology industry. I reviewed this agenda in "[Executive Order Lays Foundation for Lab-Created Foods.](#)"

In summary, Biden's September 2022 "Executive Order on Advancing Biotechnology and Biomanufacturing Innovation for a Sustainable, Safe and Secure American Bioeconomy"<sup>17</sup> makes biotechnology a national priority across agencies and branches of government, including the U.S. Department of Agriculture (USDA).

In late March 2023, Biden expanded on this premise in a "Bold Goals for U.S. Biotechnology and Biomanufacturing" report.<sup>18</sup> One of the specific goals listed in this report is "Reducing food waste by 50% by 2030." Reducing food waste to combat climate change<sup>19</sup> is also the premise upon which Apeel Sciences was founded, according to its website.<sup>20</sup>

Further evidence that Apeel Sciences fits into Biden's biotech-driven food agenda is its acquisition of ImpactVision, "a software company that uses AI and machine learning to track the chemical composition of food throughout its shelf life."<sup>21</sup> The company has also promised to "double down on technology" through other tech acquisitions.

# United States Apple (Edipeel™) Product Information Sheet

## INFORMATION

Edipeel™ is a bio active postharvest coating made from natural plant oils and waxes. It is safe for use on all fruits and vegetables by allowing moisture loss and reducing spoilage.

## STATEMENT OF COMPLIANCE

Edipeel is manufactured by Apple Systems™ in Santa Barbara, California and is registered with EPA (United States) Current Good Manufacturing Practice, Hazard Analysis, and Food Safety Practices, Canada for Further sale and use.

## REGULATORY INFORMATION

Edipeel meets the Food and Drug Administration (FDA) label (GRAS) in the United States as a surface treatment for fruits and vegetables. It is registered with EPA (United States) and is approved for use on all fruits and vegetables in registered states. Edipeel is also registered with the Canadian Food Inspection Agency (CFIA) and is approved for use on the following fruits in the European Union: Apples, Pears, Strawberries and all other fruit. Edipeel is also approved for use on the following fruits in the European Union: Apples, Pears, Strawberries and all other fruit. Edipeel is also approved for use on the following fruits in the European Union: Apples, Pears, Strawberries and all other fruit. Edipeel is also approved for use on the following fruits in the European Union: Apples, Pears, Strawberries and all other fruit.

## INGREDIENTS

Edipeel is composed of natural plant oils and waxes.

## INSTRUCTIONS FOR USE

The product is intended for consumer applications and is not intended for use in food processing facilities. Edipeel is a registered trademark of Apple Systems International, or persons licensed by Apple Systems.

Call at 1-877-626-6558 or visit [www.edipeel.com](http://www.edipeel.com)

## STORAGE

Store in a cool, dry environment.

## CHARACTER OF ORIGIN

United States

## CHEMICAL ORIGIN

Natural/ionic

## REUSE/RE STATEMENT

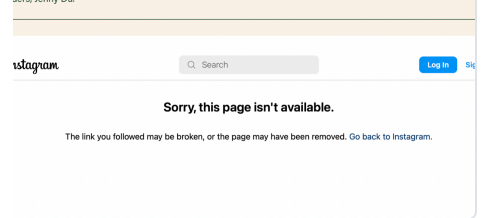

Edipeel is not intended for use in food processing facilities. Edipeel is a registered trademark of Apple Systems International, or persons licensed by Apple Systems.
